Intermittent Bulletin
Internet Volume 2, Number 4

This publication combines the information contained in the documents previously published as *Background Information: National Priorities List, Proposed Rule and Final Rule* (Publication 9320.7-051) and *Supplementary Materials: National Priorities List, Proposed Rule and Final Rule* (Publication 9320.7-061).

The U.S. Environmental Protection Agency (EPA) is proposing 11 sites to the National Priorities List (NPL) in a rule published in the *Federal Register* in July 1999. Of the 11 sites in Proposed Rule #29, 10 are in the General Superfund Section and one is in the Federal Facilities Section. All scored 28.50 or greater on the Hazard Ranking System (HRS). The States of New Jersey and Texas are each adding three sites. The State of Montana is adding two sites. The States of New Mexico, Pennsylvania, and Utah are each adding one site.

The EPA is also adding 15 sites to the NPL in a rule published in the *Federal Register* in July 1999.

Thirteen sites are in the General Superfund Section and two sites are in the Federal Facility Section; all scored 28.50 or greater on the HRS. The States of New Jersey and Virginia are each adding three sites. The States of Arkansas, California, Colorado, Maine, North Carolina, Oklahoma, Texas, and West Virginia are each adding one site. The Commonwealth of Puerto Rico is adding one site.

The NPL identifies and informs the public of uncontrolled hazardous waste sites that warrant further investigation to determine if they pose risks to human health or the environment. Such sites are eligible for long-term "remedial action" financed under the Trust Fund established by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA).

SARA authorized a "Hazardous Substances Superfund" totaling \$8.5 billion over 5 years to pay

costs for overseeing work by those responsible for cleaning up waste sites, and to pay costs for overseeing work by those responsible parties for cleaning up waste sites, and to pay costs not assumed by responsible parties for cleanup at sites in the General Superfund Section of the NPL. In October 1990, SARA was extended to September 30, 1994. Appropriations by Congress have allowed Superfund to continue to operate.

EPA's goals for the Superfund program are to:

- Address the worst sites and the worst problems first
- Make sites safe by immediately controlling acute threats to people and the environment
- Develop and use new technologies for more effective cleanups.

EPA continually seeks ways to evaluate and clean up sites more quickly. EPA has developed several measures to streamline the listing process (most notably making the HRS documentation record more succinct) and is considering others.

HOW SITES ARE PLACED ON THE NPL

EPA uses informal rulemaking to place sites on the NPL. Sites are first proposed to the NPL in the *Federal Register*. EPA then accepts public comments on the sites (typically for 60 days), responds to the comments, and finally places on the NPL those sites that continue to meet the requirements for listing.

Section 300.425 of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), the Federal regulation by which CERCLA is implemented (55 FR 8845, March 8, 1990), provides three mechanisms for placing sites on the NPL. The primary mechanism is EPA's Hazard Ranking System (HRS). The original HRS, developed in 1982, evaluated the relative threat a site posed to human health and/or the environment over five "pathways," or routes of exposure. The HRS score was based on the evaluation of three pathways through which contaminants can migrate: ground water, surface water, and air. The other two pathways, direct contact and fire/explosion, were evaluated to determine the need for immediate removal (emergency) action. HRS scores ranged from 0 to 100. An HRS score of 28.50 was selected as the cutoff point for the first proposed NPL to identify at least 400 sites, the minimum suggested by CERCLA.

On December 14, 1990 (55 FR 51532), EPA revised the HRS, as required by SARA. The revised HRS became effective on March 14, 1991. It is a more comprehensive and accurate scoring system than the original HRS and may add new types of sites to the NPL.

The revised HRS retains the same cutoff score and basic approach as the original HRS, while incorporating SARA requirements as well as improvements identified as necessary by EPA and the public. The revised HRS retains the ground water, surface water, and air pathways, drops the direct contact and fire/explosion pathways, and adds a fourth pathway, soil exposure. All four can be used to calculate the site score.

The second mechanism for placing sites on the NPL allows States or Territories to designate one top-priority site regardless of HRS score. Of the 57 States and Territories, 40 have designated top-priority sites.

Thirteen of these sites have been deleted from the NPL because no further response was necessary.

The third mechanism allows a site to be listed if it meets all three of these requirements:

- The Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends removing people from the site.
- EPA determines the site poses a significant threat to public health.
- EPA anticipates it will be more cost-effective to use its remedial authority (available only at NPL sites) than to use its emergency removal authority to respond to the site.

Thirteen sites have been listed on the NPL on the basis of ATSDR advisories:

- Nine are currently on the NPL: Forest Glen Mobile Home Subdivision, Niagara Falls, NY (54 FR 48184, November 21, 1989); White Chemical Corp., Newark, NJ (56 FR 48438, September 25, 1991); Austin Avenue Radiation Site, Delaware County, PA (57 FR 47181, October 14, 1992); Lower Ecorse Creek Dump, Wyandotte, MI (59 FR 27989, May 31, 1994); Raymark Industries, Inc., Stratford, CT (59 FR 2568 January 19, 1995); Tennessee Products, Chattanooga, TN (60 FR 50435, September 29, 1995); Aircraft Components (D&L Sales), Benton Harbor, MI; Little Valley, Little Valley, NY (61 FR

30510, June 17, 1996) and Grand Street Mercury, Hoboken, NJ (September 1997).

- Three, Lansdowne Radiation Site, Lansdowne, PA (56 FR 46121, September 10, 1991); Radium Chemical Co., Inc., New York City, NY (60 FR 15489, March 24, 1995); and H&K Sales, Belding, MI (63 FR 27855, May 21, 1998); have been deleted because all appropriate response has been completed.
- One, Quail Run Mobile Manor, Gray Summit, MO (48 FR 40674, September 8, 1983) was dropped from further consideration on February 11, 1991 (56 FR 5598). Because of an EPA removal action, ATSDR had rescinded its health advisory.

NPL Status (July 1999)

Number of Sites on Final NPL:

| | |
|-----------------------------|-------|
| Total: | 1,226 |
| General Superfund Section: | 1,068 |
| Federal Facilities Section: | 158 |

Number of Sites Remaining on Proposed NPL:

| Federal Facilities Section: | 6 |

Total Number of Final and Proposed Sites:
1,285

Number of Sites on the Construction Completion List:

608

Number of Sites Deleted from Final NPL:
185

Number of Sites with Partial Deletions:
16

STATUTORY REQUIREMENTS AND LISTING POLICIES

CERCLA restricts EPA's authority to respond to certain sites by expressly excluding some substances -- petroleum, for example -- from the definition of "release." In addition, as a matter of policy, EPA may choose not to use CERCLA because the Federal government can undertake or enforce cleanup under

other laws, thus preserving CERCLA funds for sites not covered by other laws. EPA has chosen not to use CERCLA for certain types of sites regulated by Subtitle C of the Resource Conservation and Recovery Act (RCRA) and the Nuclear Regulatory Commission (NRC). However, if EPA later determines that sites not listed as a matter of policy are not being properly responded to, it may consider placing them on the NPL.

RCRA-Related Sites

When the first final NPL was promulgated in September 1983, EPA announced certain listing policies relating to sites that might qualify for the NPL. One of these policies involved facilities subject to RCRA Subtitle C. EPA's policy was generally not to place on the NPL, RCRA "regulated units" (for example, land disposal units that received hazardous waste after the effective date of the RCRA land disposal regulations) because EPA can require the owner/operator to clean up under RCRA. The RCRA cleanup process and standards are similar to those under CERCLA, ensuring that all actions taken will protect human health and the environment.

In November 1984, the Hazardous and Solid Waste Amendments (HSWA) to RCRA were enacted, expanding EPA's authority to require corrective measures under Subtitle C. As a result of this broadened RCRA authority, EPA revised its policy for placing non-Federal RCRA-regulated sites on the NPL, and on June 10, 1986 (54 FR 21057) announced that facilities subject to RCRA Subtitle C corrective action authorities would be placed on the NPL if one or more of these conditions exists:

- The facilities are owned by persons who have demonstrated an inability to finance appropriate corrective action by invoking bankruptcy laws.
- The facilities have lost authorization to operate (also known as the Loss of Interim Status, or LOIS provision), and there are additional indications that the owner or operator is unwilling to undertake corrective action.
- The facilities have not lost authorization to operate but have a clear history of unwillingness to undertake corrective action. These situations are determined on a case-by-case basis.

On June 24, 1988 (53 FR 23978) and October 9,

1989 (54 FR 41000), EPA announced additional components of the NPL/RCRA policy. As a matter of policy, EPA will list four additional categories of RCRA-related sites:

- Facilities that were treating, storing, or disposing of Subtitle C hazardous waste after November 19, 1980, but that did not file a "Part A," the initial part of the permit application, by that date as required and have little or no history of compliance with RCRA. EPA believes that these *non- or late filers*, although they are technically subject to RCRA, are not likely to be cleaned up expeditiously under RCRA and so should be on the NPL. However, if such facilities have complied with RCRA, EPA may consider whether listing is necessary.
- Facilities with permits for the treatment, storage, or disposal of hazardous waste issued before enactment of HSWA, whose owners/operators will not voluntarily modify the permit. *Pre-HSWA permittees* are not required to take corrective action for releases. Under RCRA Section 3004(u), EPA does not have the authority to modify a pre-HSWA permit for corrective action until the permit is reissued.
- Facilities that filed a Part A permit application for treatment, storage, or disposal of Subtitle C hazardous waste as a precautionary measure only. Such facilities -- for example, generators, transporters, or recyclers of hazardous waste -- are not subject to Subtitle C corrective action authorities. These are referred to as *protective filers*.
- Facilities that at one time treated or stored Subtitle C hazardous waste but have since converted to generator-only status (i.e., facilities that now store hazardous waste for 90 days or less) or any other hazardous waste activity not requiring Interim Status. These facilities, whose Part A permit applications have been withdrawn with EPA or State approval, are referred to as *converters*. EPA believes it has the authority under RCRA Section 3008(u) to compel corrective action at such facilities. However, RCRA's corrective action program currently focuses primarily on treatment, storage, and disposal facilities (due to permitting deadlines in RCRA). Therefore, this category should be on the NPL to ensure expeditious cleanup. However, if a consent

order requiring remedial action is in effect, a converter need not be listed.

Federal Facility Sites

CERCLA Section 120(a) requires that Federal facilities be subject to and comply with CERCLA in the same manner as any nongovernmental entity. CERCLA Section 111(e)(3), however, generally prohibits use of the Trust Fund for remedial actions at Federally owned facilities. Thus, Federal agencies must use their own funds for cleanup. Federal sites are listed in a separate section of Appendix B, rather than in the General Superfund Section.

Because most Federal facilities have RCRA-regulated units within their boundaries, EPA determined that a separate NPL/RCRA policy should be adopted for Federal facilities. As a result, on March 13, 1989 (54 FR 10520), EPA announced it would place on the NPL those sites located on Federally owned or operated facilities that meet the NPL eligibility requirements -- e.g., HRS scores of 28.50 or greater -- even if the Federal facility also is subject to the corrective action authorities of RCRA Subtitle C. Cleanup, if appropriate, could then proceed at those sites under either CERCLA or RCRA. The policy is based on several considerations:

- Congress clearly intended that Federal facility sites should be on the NPL.
- Strict application of the non-Federal NPL/RCRA policy would exclude virtually all Federal facility sites from the NPL because they would not likely meet any of the criteria necessary for listing (inability to pay as evidenced by invocation of bankruptcy laws or demonstrated unwillingness to comply with RCRA).
- Placing RCRA-regulated Federal sites on the NPL serves the primary purpose of listing Federal facility sites to advise the public of the status of Federal government cleanup efforts.
- Listing these sites helps Federal agencies set priorities and focus cleanup efforts on those sites that present the most serious problem.

Radioactive Release Sites

CERCLA Section 101(22) excludes several types of releases of radioactive materials from the statutory definition of "release." These releases are therefore not

eligible for CERCLA response actions or the NPL. The exclusions apply to (1) releases of source, by-product, or special nuclear material from a nuclear incident if these releases are subject to financial protection requirements under Section 170 of the Atomic Energy Act and (2) any releases of source, by-product, or special nuclear material from any processing site designated under the Uranium Mill Tailings Radiation Control Act of 1978. Accordingly, such radioactive releases have not been considered eligible for the NPL.

As a policy matter, EPA has also chosen not to list releases of source, by-product, or special nuclear material from any facility with a current license issued by the Nuclear Regulatory Commission (NRC), on the grounds that NRC has full authority to require cleanup of releases from such facilities. EPA will, however, list releases from facilities that hold a current license issued by a State pursuant to an agreement between the State and the NRC under Section 274 of the Atomic Energy Act. Facilities whose licenses are no longer in effect are also considered for listing.

HOW SITES ARE DELETED FROM THE NPL

EPA may delete a final NPL site if it determines that no further response is required to protect human health or the environment. To date, EPA has deleted 185 sites from the NPL. Under Section 300.425(e) of the NCP (55 FR 8845, March 8, 1990,) a site may be deleted where no further response is appropriate if EPA determines that one of the following criteria has been met:

- EPA, in conjunction with the State, has determined that responsible or other parties have implemented all appropriate response action required.
- EPA, in consultation with the State, has determined that all appropriate Superfund-financed response under CERCLA has been implemented, and that no further response by responsible parties is appropriate.
- A remedial investigation has shown that the release poses no significant threat to public health or the environment, and, therefore remedial measures are not appropriate.

Since 1986, EPA has followed these procedures for deleting a site from the NPL:

- The Regional Administrator approves a "close-out report," which establishes that all appropriate response action has been taken or

that no action is required.

- The Regional Office obtains State concurrence.
- EPA publishes a notice of intent to delete in the *Federal Register* and in a major newspaper near the community involved. A public comment period is provided.
- EPA responds to the comments and, if the site continues to warrant deletion, publishes a deletion notice in the *Federal Register*.

Sites that have been deleted from the NPL remain eligible for further Superfund-financed remedial action in the unlikely event that conditions in the future warrant such action.

In November 1995, EPA initiated a new policy to delete portions of NPL sites where cleanup is complete (60 FR 55465, November 1, 1995). Total site cleanup may take many years, while portions of the site may have been cleaned up and available for productive use. As of July 1999, EPA has deleted portions of 16 sites.

REMOVING PROPOSED SITES

As of July 1999, 83 sites have been proposed for the NPL but subsequently removed from further consideration, most of them because their final HRS scores were below the 28.50 cutoff or they are subject to RCRA Subtitle C. Three of the sites were repropoed on February 7, 1992 (57 FR 4824) after being rescored with the revised HRS.

CONSTRUCTION COMPLETION LIST

EPA has developed the Construction Completion List (CCL) (58 FR 12142, March 2, 1993) to better show the successful completion of Superfund response action at present or former NPL sites. The CCL is intended to enhance public understanding of the status of cleanup progress at sites. The CCL now totals 608 sites.

ADDITIONAL PUBLICATIONS

Another publication relative to this rule is available on the Internet at www.epa.gov/superfund:

- *Descriptions of 11 Proposed Sites and 15 Final Sites Added to the National Priorities List in July 1999.* Volume 2, Number 4, July 1999.

Key Dates in Superfund

Legislation

- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) enacted **December 11, 1980**; Trust Fund of \$1.6 billion authorized over 5 years
- CERCLA amended by Superfund Amendments and Reauthorization Act (SARA) enacted **October 17, 1986**; Trust Fund of \$8.5 billion authorized over 5 years
- CERCLA extended to **September 30, 1994**; an additional \$5.1 billion authorized

Federal Regulation Implementing Superfund: National Oil and Hazardous Substances Pollution Contingency Plan (NCP)

- Revised **July 16, 1982** (47 FR 31180) to incorporate CERCLA requirements
- Revised **March 8, 1990** (55 FR 8666) in response to CERCLA Section 105, amended by SARA

Hazard Ranking System

- Promulgated **July 16, 1982** (47 FR 31180) as Appendix A of the NCP
- Revised **December 14, 1990** (55 FR 51532) in response to CERCLA Section 105(c), added by SARA; effective date **March 14, 1991**

National Priorities List

- Promulgated **September 8, 1983** (48 FR 40658) as Appendix B of the NCP
- Must be updated at least annually
- Last sites proposed under original HRS promulgated **February 11, 1991** (56 FR 5598); Construction Completion category activated (56 FR 5634)
- First sites proposed under revised HRS **July 29, 1991** (56 FR 35840)
- First sites added to NPL under revised HRS **October 14, 1992** (57 FR 47181)
- Construction Completion List activated **March 2, 1993** (58 FR 12142)
- Partial deletion policy announced and implementation began **November 1, 1996** (60 FR 55465)

National Priorities List
Final and Proposed Sites (by State)
July 1999

| St | Site Name | Location | Date | | Notes(b) |
|----|--|----------|-------------|-------|----------|
| | | | Proposed(a) | Final | |
| | Federal Facility Sites | | | | |
| | F.E. Warren Air Force Base | Cheyenne | 07/89 | 02/90 | F |
| | 2 General Superfund Sites + 1 Federal Facility Sites = 3 | | | | |
| | 1121 General Superfund Sites + 164 Federal Facility Sites = 1285 | | | | |

(a) Date first eligible for Superfund action. First NPL proposed 12/82. Some sites were announced earlier in the Interim Priorities List (10/81) and Expanded Eligibility List (7/82); most were included in the first proposed NPL.

(b) A = Based on issuance of health advisory by Agency for Toxic Substances and Disease Registry (if scored, HRS score need not be > 28.50).

F = Federal facility site, not eligible for Superfund-financed response.

S = State top priority (included among the 100 top priority sites regardless of score).
